3

03 NAMEPLATES

Minimal white and forge glow. Blank space for your name.

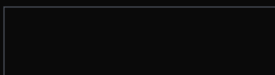

2

04 CAMERA FRAMES

Horizontal and vertical frames with transparent centers.

2

THE PALETTE

Charcoal
#0A0A0A

Electric Orange
#FD4802

Deep Blue
#0E1A3D

Neon Cyan
#00D4FF

Off-White
#F5F5F5

TYPE + LOGO CARE

Bebas Neue for display text. Outfit for names, captions and UI. Use the supplied wordmark artwork; do not retype it. Keep the aspect ratio intact. The brand guide sets a 120 px minimum full-logo width and 32 px minimum icon width.

Leave clear space around the visible logo equal to the height of the F. Add extra empty space in your scene as needed; transparent file padding alone does not guarantee that margin. Use a dark scrim behind the full-color logo on busy footage.

LOGOS + CORNER MARKS

Checkerboard is a preview surface only. It is not baked into the PNGs.

Logo - original color

1983 x 793 px / transparent PNG

Logo - clean white

1774 x 887 px / transparent PNG

Logo - orange glow

1774 x 887 px / transparent PNG

Logo - cyan glow

1774 x 887 px / transparent PNG

Logo - white glow

1774 x 887 px / transparent PNG

Corner mark - primary

1254 x 1254 px / transparent PNG

Corner mark - white

1254 x 1254 px / transparent PNG

Corner mark - cyan glow

1254 x 1254 px / transparent PNG

For an unobtrusive overlay, start with the original mark or clean white. Use glow treatments as accents. Check the chosen graphic against both bright and dark moments in your stream.

NAMEPLATES + CAMERA FRAMES

Reusable components. Keep creator names as a separate text source.

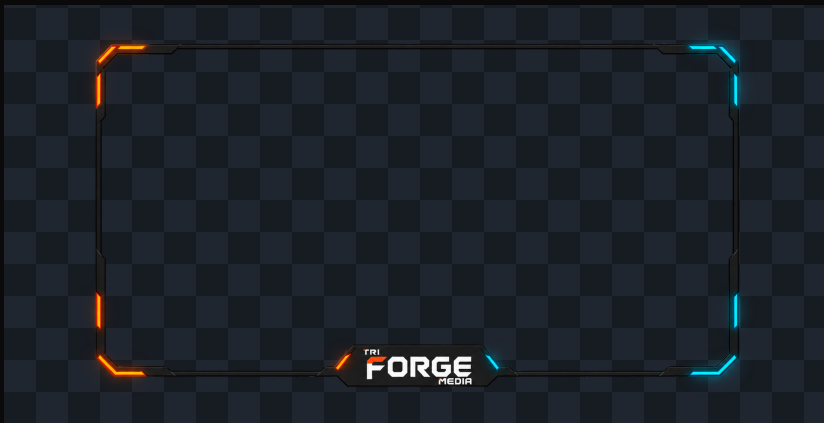

Nameplate - minimal white

2172 x 724 px / transparent PNG

Nameplate - forge glow

2172 x 724 px / transparent PNG

Camera frame - horizontal

1672 x 941 px / transparent PNG

ADD IT TO YOUR STREAM

- 1 Extract the ZIP to a permanent folder.
- 2 Add the chosen PNG as an Image source.
- 3 Place it above your camera or gameplay. Fit the camera beneath the frame opening.
- 4 For a nameplate, add your display name as a separate text source. Use Outfit SemiBold.
- 5 Resize proportionally, check the live preview, then lock or group the layout.

Camera frame - vertical

941 x 1672 px

These are static PNG graphics. Transparent regions require no chroma key. The source dimensions are shown in the catalog; scale proportionally in your streaming application. OBS Image Sources documentation: obsproject.com/kb/image-sources
